Northside Legal Aid Clinic

Accessible workshop booking and private intake

FICTIONAL SAMPLE — NOT LIVE OPERATIONAL DOCUMENTATION

Draft — organization confirmation pending

Version 1.0 | October 17, 2026

Implementation plan

1. Separate public workshop registration from restricted follow-up intake.

2. Test bilingual registration and keyboard navigation with fictional examples.

3. Verify that public booking users cannot read private intake records.

4. Review retention requirements before collecting confidential case information.

5. Contractor review is complete in the sample; organization acceptance remains pending.

Validation and handoff

Use synthetic test records. The coordinator checks permissions, workflow accuracy, and recovery results. Sample documents do not change project confirmation status.

Maintenance

The operations coordinator reviews access monthly and records backup and restore checks. Never put passwords or client information in these documents.
